

Manufacturing Excellence Network

Manufacturing Excellence

Our goal is to collaborate in identifying and resolving skills gaps and issues while converting knowledge into best practice, for the manufacturing sector in the West Region (Galway, Mayo, Roscommon).

Priorities:

- Ensure all further and higher education courses related to manufacturing in the west Region are as industry relevant as possible while keeping the learner's best interests at heart
- Provide timely industry input into new courses being developed by education and training providers for the West Region
- Align with and feed into relevant Government strategies & initiatives such as Future Jobs 2040, Ireland's Industry 4.0 Strategy 2020-2025 etc
- **Co-develop new further and higher-level courses** as needed for the West Region:
 - **supporting the digital transformation of the manufacturing sector and its supply chain/** Industry 4.0 (for example, automation, robotics, AI, industrial IOT, lean)
 - the transition to a **low carbon economy**
 - **increasing SME productivity**

Join Us Today!

If you are interested in joining the Manufacturing Excellence Network or learning about upcoming events, please contact westadmin@regionalskills.ie

Membership:

The Manufacturing Excellence Network was established by industry partnering with Regional Skills West in 2020 and is headed by a private-sector lead. Our Steering Group membership is drawn from a range of interested manufacturing companies from different sectors, including multi-national companies and indigenous

SMEs as well as state-funded education and training providers operating in the West region. We welcome new Steering Group members or you can join the wider network free of charge – you can also sign up to our mailing list to attend events and hear the latest news.

Funded by the **National Training Fund**
